ERICK EDEL BELTRÁN CASTILLO

FRONTEND ENGINEER | REACT, REACT NATIVE & TYPESCRIPT

Los Mochis, Sinaloa, Mexico | erickedelbeltran@gmail.com | +52 668 220 1744

Portfolio: edcastsh.vercel.app | GitHub: github.com/edcastsh

PROFESSIONAL SUMMARY

Software engineer with 4+ years of experience building and maintaining production web and mobile applications using React, React Native, TypeScript, JavaScript, and Node.js. Experienced in reusable component architecture, state management, REST API integrations, automated testing, and CI/CD. Combines hands-on product development with technical leadership, production troubleshooting, and AI-assisted engineering workflows. Focused on reliable, maintainable software and cross-functional delivery.

TECHNICAL SKILLS

Frontend & Mobile: React, React Native, TypeScript, JavaScript (ES6+), React Hooks, Redux, Redux Saga, Context API, Zustand, Vite, React-Leaflet

Backend & APIs: Node.js, Express, REST APIs, API integration, background workers, cron jobs

Testing & Quality: Jest, unit testing, integration testing, test-driven development, code reviews

Data: PostgreSQL, MySQL, MongoDB, SQLite

DevOps & Delivery: Git, GitHub Actions, GitLab CI/CD, Docker, Azure, DigitalOcean, Railway

UI & Engineering: Tailwind CSS, Material UI, shadcn/ui, Storybook, reusable components, design patterns, technical documentation

AI-assisted engineering: Cursor, Claude CLI, AI-assisted debugging and code review, RAG concepts, n8n, MCP-based workflow automation

PROFESSIONAL EXPERIENCE

Avondale Auto Glass | *October 2025 – Present*

Tech Lead & Project Manager

- Architect and maintain a full-stack B2B/B2C platform spanning three applications for wholesale and retail auto-glass distribution.
- Lead a team of 5+ developers, establishing coding standards, Git workflows, code reviews, and delivery practices.
- Develop inventory and order-processing capabilities, including Clover payment integration and stock tracking across multiple warehouses.
- Built AI-assisted issue-triage and requirements-generation workflows that turn technical discussions into structured requirements, user stories, and acceptance criteria.
- Established architecture documentation and decision records to improve consistency across repositories and support context-aware engineering workflows.
- Automated cross-tool workflows connecting GitHub, Jira, and Slack, and introduced test-driven, vertical-slice planning practices.

Slalom (Amazon Pay Studio) – Inetum | *November 2024 – October 2025*

Senior Software Development Engineer

- Maintained a cross-platform React Native library built with TypeScript for web and mobile applications.
- Developed reusable components and product features adopted by engineering teams across multiple departments.
- Implemented automated tests with Jest and contributed to code reviews to improve reliability and maintainability.
- Collaborated with engineering, product, and design stakeholders on architecture decisions and features used by a global audience.

Ola Technologies | *May 2023 – November 2024*

Full Stack Developer

- Built an automated newsletter engine that generated recurring bulletins with PDF reports and live charts, eliminating manual report preparation.
- Integrated Chargebee subscription workflows for plans, discounts, upgrades, and coupons, plus a background worker to flag failed payments and churn risk.
- Delivered paid analytics dashboards for price forecasting, market prices, and packer margins using USDA data.

- Wrote Jest unit and integration tests for critical authentication, payment, registration, and web flows to reduce production regressions.

Xira | *January 2022 – May 2023*

Support Engineer / SRE

- Monitored production servers and troubleshot incidents reported by users and internal teams.
- Created automated monitoring scripts for 12 production servers, eliminating recurring manual checks.
- Investigated production issues through log analysis, debugging, and root-cause troubleshooting.

SELECTED PROJECT

Gasolinazo | gasolinazo.vercel.app

Mobile-first application that helps drivers in Mexico compare nearby gasoline prices. Built with React, TypeScript, and Vite, using React-Leaflet for maps, TanStack Query for data fetching, and Zustand for state management. A nightly data pipeline updates national gasoline prices.

EDUCATION

B.S. Mechatronics Engineering — Instituto Tecnológico de Los Mochis, 2021

Electronics Technician — CETis 108, 2016

LANGUAGES

Spanish: Native | English: Advanced (C1 speaking)
